

**Why wait  
when I can shape  
my future?**

**64** percent of Colombian coal is exported to Europe

**59** thousand people were forcibly displaced and more than 3,000 died in Colombia because of two coal mines

**22** thousand premature deaths a year are caused by pollution from European coal-fired power stations

## Why wait when I can shape my city?

Cities and municipalities are where life really happens. But how can this life be made into a good life for each and every one of us?

In our campaign "A good life is simple", we showcase positive examples and offer new ways for you to integrate climate protection into your daily life. Incentives have been created in the fields of energy, mobility, consumption and nutrition to empower citizens to become active.

Reach out to your citizens and seize this opportunity to enter into a dialogue! Why not also invite your partner town/city to run the campaign at the same time? We offer free materials in more than 13 languages.

A good life for all can only be achieved if we work together.

# Why wait when I can shape my future?

The "Change the Future" online tool offers municipalities, groups and individuals the opportunity to make a direct commitment to achieving a good life for all. The activities we have compiled in the fields of energy, mobility, consumption and nutrition suggest a variety of ways to get involved – either alone or as a team. The tool gives some preliminary impetus and ideas – especially for those who are not already active.

Invite your citizens to commit to sustainable development! Why not offer the tool at the same time as your twin or neighbouring town/city to create some friendly competition? Who can encourage the most citizens to participate and collect the most Changer Points? And who can even get their local council to commit for the next few weeks?

The tool is free to use and available in several languages. Interested? Contact us!

This offer was developed as part of the project „Change the Power –(Em) Power to Change: Local Authorities towards the SDGs and Climate Justice“ with financial support from the European Union.

4 topics	4 topics
10 motifs	24 suggestions to become active
13 languages	791 potential Changer Points

## Climate Alliance of European Cities with Indigenous Rainforest Peoples

With 1,700 members in 26 European countries, Climate Alliance is the largest city network dedicated to climate action. Because our lifestyle has a direct impact on particularly threatened peoples and places on earth, Climate Alliance combines local action with global responsibility.
